

ELEMENTARY SUMMER CLASSES

This summer, we're thrilled to offer four brand new, two week specialty classes created just for our elementary students! Each full day experience from 9:00 a.m. to 3:00 p.m. is packed with hands-on learning, creativity, and fun. Designed to spark curiosity and build confidence, these classes make summer a season of discovery, growth, and unforgettable memories. All materials and supplies are included, so students simply need to bring their enthusiasm and get ready for an amazing summer!

#1: Monday, June 15 - Friday, June 26th

Creative Arts & Crafts with Bill

Students will explore their creativity through both individual and group art projects inspired by nature, stories, and imaginative characters. As they learn fundamental art concepts like line, color, form, and space, they'll build a personal portfolio filled with paintings, sculptures, weaving, models, and other hands-on creations. The session also includes cooperative and team-based initiative games for a fun, collaborative experience. We'll conclude with a special Art Expo to celebrate all their hard work and creativity!

World Cup Soccer with Emma

Get ready for a global adventure! In this exciting two-week World Cup-themed session, students will explore countries represented in the FIFA World Cup while celebrating the energy of international soccer. Each day, they'll "travel" to a new country through outdoor soccer challenges and mini tournaments, creative arts and crafts, flag decorating, geography games, and even tasting traditional foods. It's an engaging blend of sports, culture, teamwork, and hands-on discovery from around the world!

#2: Monday, June 29th - Friday, July 10th (No School Fri. 7/3)

Become a Mad Scientist with Bill

Get ready for hands-on science adventures and mind-blowing experiments! Students will explore the laws of the universe, gravity, chemical reactions, electricity, magnetism, light, and lasers—plus design, build, and launch their own rockets. Along the way, they'll strengthen problem-solving skills as they design and invent creative machines and solutions. The session also includes cooperative and team-based initiative games, and concludes with an exciting Science Fair to showcase their experiments and innovations.

Young Makers Workshop with Angelica

This handwork and building class invites elementary students to explore a myriad of fun projects in a supportive Montessori environment. From stitching and friendship bracelets to model construction and simple wooden keepsakes, students will develop confidence, patience, problem-solving skills, and fine motor coordination. Each child will complete hands-on projects they can proudly bring home, creations they made themselves.

#3: Monday, July 13th - Friday, July 24th

Become a Musician with Bill

Discover the joy of making music in this hands-on introduction to guitar and keyboard. Students will learn basic chords, strumming, and simple songs, many favorites they already know from school, while exploring music theory and song techniques. The real excitement comes from playing together, building teamwork, and creating harmonies as a group. The session also includes cooperative and team based games and concludes with a voluntary performance for families and friends to celebrate their musical accomplishments.

Nature Art with Emma

Calling all young artists and nature lovers! In this two-week adventure, students will explore the outdoors and transform natural inspiration into creative art projects. From nature walks to hands-on artwork using plants, wildlife, and landscapes as their muse, each child will build a personal portfolio of unique, nature-inspired creations. It's a fun and imaginative experience that blends creativity, exploration, and unforgettable summer memories!

#4: Monday, July 27th - Friday, August 7th

"It's Showtime: with Bill

Step into the spotlight in this exciting two-week theater adventure! Students will collaborate to adapt a beloved story into a script, assign roles, and rehearse lines, songs, and dance numbers. They'll create costumes, props, and backdrop scenery, as well as design invitations, flyers, posters, and programs for the show. The session also includes cooperative and team-based games, building teamwork and creativity along the way. It all culminates in a spectacular final performance for family and friends to enjoy!

Amazing Science with Emma

Dive into the wonders of science in this hands-on, interactive adventure! Students will explore experiments, solve puzzles, and design creative projects just like real scientists. From making slime and erupting mini volcanoes to exploring magnets, chemical reactions, plants, and weather, every activity sparks curiosity and discovery. This fun, playful, and engaging session brings science to life through exploration, creativity, and hands-on learning!
